The pursuit of perfect sound.

Sound is amazing. No other sense affects the brain in the same way as sound does. It creates electrical impulses that dance from synapse to synapse. It sends shivers shooting up and down your spine. It makes the hairs on the back of your neck reach for the heavens.

We at Sennheiser have always been driven by the pursuit of perfect sound. We want you not only to hear all aspects of sound but also to feel them.

Please visit www.sennheiser.com for more information.

Sounds that come alive.

We shape the future of audio based on our heritage, innovative inspiration and passion for excellence. For almost 70 years our name has been standing for top-quality products, true sound and tailor-made solutions for every aspect of recording, transmission and reproduction of sound. For us, good sound is not enough. We want to achieve the perfect sound. We want to make sound come alive.

The way to this achievement has been paved by trailblazing ideas. Ever since electrical engineer Prof. Dr. Fritz Sennheiser founded the company in 1945, Sennheiser has been continuously setting trends in the audio industry. Whether our customers are artists, disc jockeys, pilots, scientists, sound technicians or demanding music lovers, Sennheiser always stands for premium products. With German engineering and decades of experience in innovative science, we stay true to the sound. We strive for excellence, for ease of operation and supreme quality. And we set new standards for headphones, headsets, microphones and integrated systems.

Audiophile sound. High-end components.

The lifelike, untainted sound of audiophile equipment will transport you into a world like no other. You will feel as if you were in the middle of a concert hall. Immerse yourself in the sound and enjoy.

HD 800

The HD 800 are handmade reference class headphones that set new standards. Their pure, spatial sound is in a class of their own, in terms of detail and natural tones.

- Realistic and natural sound field with minimal resonance
- New innovative dynamic transducer design
- Frequency response: 6–51,000 Hz (-10 dB)
- Impedance: 300 Ω

IE 800 **NEW!**

At the heart of the IE 800 are several small but invaluable breakthroughs, like the perfected extra wide-band (XWB) transducer system. Flaunting a diameter of only 7 mm, it is currently the smallest extra wide-band sound transducer available in dynamic ear canal phones and promises distortion-free sound, capable of performing even at high sound pressure levels. Patented D2CA (dampened two-chamber absorber) technology enables the best high-frequency perception ever with an ear canal phone.

- Two protective meshes – one situated in the ear cushion and one in the cone, offering easy cleaning and effective protection against dirt contamination
- Very low overall harmonic distortion
- Frequency response: 5–46,500 Hz (–10 dB)
- SPL (at 1 kHz, 1 V): 103 dB
- Impedance: 18 Ω

HDVD 800 **NEW!**

Designed and manufactured in Germany, this high-end, solid-state amplifier harmonizes perfectly and delivers an ultimate acoustic performance when paired with any of Sennheiser's audiophile headphones.

- Digital and analog signal processing
- Metal-crafted design and high-quality components
- High-quality Burr-Brown digital/analog converter (DAC)
- Up to 24 bit/192 kHz sampling frequency
- Symmetrical and asymmetrical inputs and outputs

HDVA 600 **NEW!**

The premium HDVA 600 amplifier is manufactured and designed in Germany and features a fully symmetrical layout for operation with analog audio sources. It has an anodized aluminum housing, potentiometer control and rotary switch. Embedded in the aluminum housing is a glass panel which offers a view of the meticulously selected components. This amplifier brings the best out of any of Sennheiser's audiophile headphones.

- Analog signal processing
- Metal-crafted design and high-quality components
- Symmetrical and asymmetrical inputs and outputs

Home entertainment. Wired headphones.

Wired stereo headphones allow you to experience your favorite music with greater intensity than ever before. Plus, padded headbands and soft earpads ensure excellent comfort.

HD 700

Immense audio enjoyment at your fingertips. With innovative and highly aesthetic dual-material yoke, and angled acoustic baffle for optimal sound experience, the HD 700 invites you to bask in true audio enjoyment.

- Innovative and highly aesthetic dual-material yoke
- Angled acoustic baffle for optimal sound experience
- Frequency response: 8–44,000 Hz (-10 dB)
- Impedance: 150 Ω

HD 650

With their hand-selected and highly optimized magnet systems for each pair, these open, dynamic hi-fi headphones are top class.

- Balanced and transparent sound
- Elegant titanium silver finish
- Frequency response: 10–39,500 Hz
- Impedance: 300 Ω

HD 600

You will experience a particularly detailed sound with these open, dynamic hi-fi headphones. The powerfully reduced total harmonic distortion (THD) ensures extremely pure audio.

- Natural, spatial sound
- Excellent transient response
- Frequency response: 12–39,000 Hz
- Impedance: 300 Ω

HD 598

E.A.R. technology and compressed cellulose fleece bring sound enjoyment to the next level while a high-quality leatherette headband and velour earpads provide outstanding comfort and luxury.

- Exceptional clarity and musicality
- Premium beige and burl wood finish
- Frequency response: 12–38,500 Hz
- SPL (at 1 kHz, 1 V): 112 dB

HD 558

Get the full movie and music experience with a Surround Reflector that generates an extended spatial sound field for an enhanced audio reproduction.

- Outstanding bass and vocal projection
- Surround Reflector for extended spatial sound field
- Frequency response: 15–28,000 Hz
- SPL (at 1 kHz, 1 V): 112 dB

HD 518

Sennheiser's innovative E.A.R. technology, special Duofol diaphragms and generously padded earpads bring comfort and quality together.

- State-of-the-art Duofol diaphragms
- Outstanding comfort for long listening sessions
- Frequency response: 14–26,000 Hz
- SPL (at 1 kHz, 1 V): 108 dB

HD 439

For a combination of street style and prowess, the HD 439 closed-back stereo headphones are the choice. These headphones offer you the world of audio in a bold and revolutionary design, including a chrome inner lining and black mesh turbines. Enjoy an enhanced and outstanding bass performance.

- Ergonomic design provides a comfortable fit
- Choice of two single-sided cables for flexible length and convenience
- Frequency response: 17–22,500 Hz
- SPL (at 1 kHz, 1 V): 112 dB

HD 429

The HD 429 features a powerful bass response provided by high-output neodymium magnets. These headphones have an innovative and ergonomic silicone design, providing durability and a comfortable fit every single time. Their closed circumaural headphone configuration effectively isolates ambient noise while the single-sided cable reduces tangling.

- Closed circumaural design blocks out ambient noise
- Single-sided cable for freedom of movement
- Frequency response: 18–22,000 Hz
- SPL (at 1 kHz, 1 V): 110 dB

Portable entertainment. Music.

A dynamic, balanced sound and a varied range of applications distinguish these classic, portable headphones and earphones. The designs are equally diverse. Take your pick.

MOMENTUM

Experience the fine art of sound with all your senses made possible by these high-end, closed circumaural headphones designed using the finest leather for earpads, ensuring maximum style and comfort. These headphones also exhibit many other cutting-edge features such as luxurious and tough breathable leather headband, metal-constructed earcup slider for maximum durability and custom fit, plus an integrated smart remote with microphone unit for ease of use.

Now also available in black!

- Closed circumaural headphone design isolates ambient noise
- Soft and supple leather earpads for excellent wearing comfort
- Frequency response: 16–22,000 Hz
- SPL (at 1 kHz, 1 V): 110 dB

IE 80

The IE 80 features high-fidelity stereo sound and high noise attenuation with an enhanced design. Encased in a brushed metal housing and rugged, interchangeable cable, it is built for maximum robustness and flexibility. It also features a unique technology that enables sound-tuning of bass response. A world of premium audio awaits your discovery.

- Extremely durable housing and rugged, interchangeable cable
- Unique manual frequency response tuning function
- Frequency response: 10–20,000 Hz
- SPL (at 1 kHz, 1 V): 125 dB

IE 60

With dynamic drivers and powerful neodymium magnets, the IE 60 ear-canal phones deliver not only high-fidelity sound but also outstanding bass response and noise isolation. With a durable housing and tough cabling, it is designed for robustness. Quality construction complete with a protective case, cleaning tool and various ear adapter sets, these earphones will redefine your imagination of sound.

- Excellent attenuation of ambient noise
- Extremely durable housing and rugged cable
- Frequency response: 10–18,000 Hz
- SPL (at 1 kHz, 1 V): 115 dB

IE 8i

The IE 8i marks a milestone in the development of ear-canal headsets. With its unique technology, the IE 8i enables the user to precisely fine-tune the bass response. It also features a remote unit enabling you to fully control your iDevice – simply push the buttons integrated in the cable to control the music player or calls as well as the Voice Control.

- Excellent attenuation of ambient noise
- Dynamic drivers with powerful neodymium magnets ensure outstanding sonic accuracy and clarity
- Frequency response: 10–20,000 Hz
- SPL (at 1 kHz, 1 V): 125 dB

CX 985

A perennial classic, the luxe CX 985 ear-canal phones boasts several cutting-edge features that reiterate top-notch quality and robustness. Highlighting intricate craftsmanship, the modular ear sleeves offer sound tuning and the choice between balanced and bass-driven audio reproduction. Expect high-fidelity audio experience from either selection.

- Speaker systems engineered with neodymium magnets for a balanced audio reproduction
- Ear adapters contoured to create comfort and modular sound tuning
- Frequency response: 16–24,000 Hz
- SPL (at 1 kHz, 1 V): 115 dB

CX 890i

Eye-catching and stylish, these earphones have a distinctive glassy design. In addition to their attractive appearance, they also feature high-fidelity lifelike sound, high passive noise attenuation and a smart remote with microphone for easy management of tracks and calls on the fly.

- Distinctive glassy design accentuates your style
- High passive noise attenuation
- Frequency response: 17–23,000 Hz
- SPL (at 1 kHz, 1 V): 115 dB

CX 880i

These ear-canal phones exude an understated elegance and are a simple way to power up your professional image while their highly advanced acoustic systems and diaphragm guards produce a high-fidelity lifelike sound. These are matched with dual hardness silicon ear adapters, ensuring high passive attenuation of ambient noise and a smart remote with microphone for use with Apple devices.

- High-fidelity lifelike sound
- Silicon ear adapters for a personalized comfort fit
- Frequency response: 17–23,000 Hz
- SPL (at 1 kHz, 1 V): 115 dB

CX 880

These ear-canal phones exude an understated elegance and are a simple way to power up your professional image while their highly advanced acoustic systems and diaphragm guards produce a high-fidelity lifelike sound. These are matched with dual hardness silicon ear adapters, ensuring high passive attenuation of ambient noise.

- High-fidelity lifelike sound
- Silicon ear adapters for a personalized comfort fit
- Frequency response: 17–23,000 Hz
- SPL (at 1 kHz, 1 V): 115 dB

MX 985

A splash of accentuated style and sophistication is what the MX 985 earphones will offer. These contemporary earphones have a polished, brushed metal look. In addition, they are complemented by various advanced features, like their improved rotatable 3.5 mm metal plug which is 30 percent smaller, making it less bulky and a choice preference of a straight or angled position.

- Speaker systems engineered with neodymium magnets for excellent audio experience
- Highly aesthetic durable alloy design
- Frequency response: 16–23,000 Hz
- SPL (at 1 kHz, 1 V): 120 dB

PX 360

Great sound with a timeless design. The PX 360 headphones offer excellent sound reproduction while their closed, circumaural design effectively blocks out ambient noise. Their single-sided audio cable offers less tangling and it also provides easy access to your portable media player.

- Collapsible, metal-reinforced headband
- High passive noise attenuation
- Frequency response: 15–22,000 Hz
- SPL (at 1 kHz, 1 V): 110 dB

MM 70s **NEW!**

Sennheiser's MM 70s universal ear-canal headset for Smartphones with an in-line remote with integrated microphone makes it easy to manage phone calls, volume and music tracks.

- Frequency response: 18–22,000 Hz
- SPL (at 1 kHz, 1 V): 106 dB
- Universal fit with any smartphone brands featuring a 3.5 mm headphone jack
- Smart in-line remote control with microphone

MM 70i White

The Sennheiser MM 70i for Apple devices features a sleek in-line remote with microphone – giving complete control over essential call and music-playing functions with superior musical detail resolution and precise dynamics.

- Effective noise blocking
- Smart in-line remote control with microphone
- Frequency response: 18–22,000 Hz
- SPL (at 1 kHz, 1 V): 106 dB
- The MM 70i is available in black or white

HD 429s **NEW!**

With Sennheiser's HD 429s universal headset for on-the-go music, entertainment and communication you can enjoy Sennheiser sound quality everywhere regardless of which smartphone you have. The high-output neodymium magnets for stereo sound with smooth bass response provide an outstanding audio performance while the closed around-the-ear headphone design isolates ambient noise.

- Universal fit with any smartphone brand featuring 3.5 mm headphone jack
- Closed circumaural design blocks out ambient noise
- Smart in-line remote control with microphone
- Frequency response: 18–22,000 Hz
- SPL (at 1 kHz, 1 V): 110 dB

CX 275s **NEW!**

Perfect for any smartphone! The ergonomic CX 275s ear-canal headset is suitable for all smartphone brands featuring a 3.5 mm headphone jack. It delivers excellent passive attenuation of ambient noise as well as outstanding bass-driven stereo sound. Use it to talk, listen to music and control your playlists.

- Universal fit with any smartphone brand featuring a 3.5 mm headphone jack
- Great bass-driven stereo sound
- Frequency response: 17–23,000 Hz
- SPL (at 1 kHz, 1 V): 121 dB

MM 50 for iPhone

MM 50 for iPhone is a tailor-made headset that allows iPhone users to have excellent communication capabilities matched with a top-class mobile music experience to ensure maximum pleasure.

- Isolates ambient noise
- Natural sound reproduction
- Frequency response: 18–22,000 Hz
- SPL (at 1 kHz, 1 V): 106 dB
- Available in black or white

MM 30i

The ergonomic MM30i headset gives you superior bass and your iPhone the sound it deserves. Its snug-fitting ear sleeves effectively block out background noise, so that you are able to feel the beat. The smart in-line remote with microphone puts the full set of controls within easy reach. Effortlessly slip on this headset and experience the signature sound of Sennheiser.

- Effective noise attenuation
- Choice of ear-sleeve sizes for a comfortable custom fit
- Frequency response: 17–20,000 Hz
- SPL (at 1 kHz, 1 V): 106 dB
- Available in black or white

PX 200-II / PX 200-III

The closed, dynamic, supra-aural PX 200-II mini headphones are not only ideal for great sound enjoyment but they also provide excellent isolation. Their soft leatherette earpads provide outstanding wearing comfort. Also, an integrated volume control on the cable allows for enhanced usability and convenience.

- Unique fold-and-flip design
- Rugged and robust
- Frequency response: 10–21,000 Hz
- SPL (at 1 kHz, 1 V): 115 dB
- The PX 200-III comes with a smart in-line remote control with microphone for iPod, iPhone and iPad.

PX 100-II / PX 100-III

A musical all-rounder, the PX 100-II supra-aural mini headphones let you enjoy your personal favorites at any time. Their dynamic open earcup design allows for a natural sound reproduction with strong bass. Simply fold them up to fit into the soft carrying case for enhanced portability.

- Mini headphones with open construction
- Steel-reinforced headband
- Frequency response: 15–27,000 Hz
- SPL (at 1 kHz, 1 V): 114 dB
- The PX 100-III comes with a smart in-line remote control with microphone for iPod, iPhone and iPad.

CX 215

Get fresh and funky with the CX 215 stylish ear-canal phones that come in five trendy colors for you to choose from. They feature an innovative finger-contoured housing design for easy adjustment and optimal wearing comfort in the ears. These earphones also block out ambient noise and deliver a powerful bass-driven sound experience.

- Innovative finger-contoured housing design
- High passive attenuation of ambient noise
- Frequency response: 20–20,000 Hz
- SPL (at 1 kHz, 1 V): 110 dB

CX 175

Clad in an attractive appearance, the CX 175 ear-canal phones are no less than charming. Offering an outstanding audio performance, thanks to their dynamic speaker systems, they also include various ear adapter sets for excellent fit and ambient noise attenuation. Strut in style and let the music flow.

- Dynamic speaker systems for an outstanding audio performance
- Ear adapter sets for excellent ambient noise attenuation
- Frequency response: 17–23,000 Hz
- SPL (at 1 kHz, 1 V): 121 dB

MX 581

There is nothing like the chic and sleek MX 581 to ramp up your coolness factor. Their high-quality speaker system produces an excellent bass-driven stereo sound, perfect for your rock and pop ballads. Especially suited for small ears, they also come with an integrated volume control as well as a sharing adapter.

- Adapter for two headphone connectors
- Integrated volume control
- Frequency response: 18–21,000 Hz
- SPL (at 1 kHz, 1 V): 119 dB

MX 580

Pump up the volume with the MX 580 ear-phones. Not only do they provide a particularly clear sound on the move, they are also comfortable to wear. They come with an integrated volume control and a storage pouch to provide the highest degree of convenience.

- Ergonomic design for good grip
- Integrated volume control
- Frequency response: 18–21,000 Hz
- SPL (at 1 kHz, 1 V): 119 dB

MX 471

Eyes will be drawn to you when you put on the MX 471 earphones. Not only have they been ergonomically designed for individuals with smaller ears, they also come with unique red and gold graphics on their housings. Equipped with Sennheiser's innovative LiveBass system, a wondrous bass experience follows.

- Symmetrical braided-design cable for a tangle-free listening experience
- LiveBass system for powerful bass boost
- Frequency response: 18–20,000 Hz
- SPL (at 1 kHz, 1 V): 119 dB

MX 470

Equipped with Sennheiser's innovative LiveBass-system for thumping bass sounds, the ergonomically shaped MX 470 allow you to groove to the beat. Featuring comfortable ear sleeves, a superior fit is achieved. If continuous music is expected everywhere you go, these earphones make the perfect listening accessory.

- LiveBass system for powerful bass boost
- Symmetrical cable for a tangle-free listening experience
- Frequency response: 18–20,000 Hz
- SPL (at 1 kHz, 1 V): 119 dB

MX 375

Your search for stylish earphones is over. These sleek and ergonomically designed earphones offer an optimum fit and comfort. Their high-performance dynamic drivers deliver powerful, booming bass while you are able to relax and enjoy pure audio immersion.

- Dynamic drivers for powerful, booming bass
- Ergonomically designed for optimum fit and comfort
- Frequency response: 18–22,000 Hz
- SPL (at 1 kHz, 1 V): 122 dB

MX 365

These earphones are when classic design meets expressive colors. Choose from six trendy colors to match your style and enjoy a powerful, bass-driven sound performance. High wearing comfort is also ensured while on the go. Clearly, these distinctive MX 365 earphones are made to be heard and seen.

- Powerful, bass-driven stereo sound
- Outstanding wearing comfort
- Frequency response: 20–20,000 Hz
- SPL (at 1 kHz, 1 V): 110 dB

OMX 185

These earphones sport flexible ear hooks that not only ensure a custom and secure fit, but are also capable of matching your active lifestyle. Delivering powerful, bass-driven stereo sound, walk into a perfect mix of tunes and life rolled into one innovative and alluring experience.

- Powerful, bass-driven stereo sound
- Flexible ear hooks ensure a custom and secure fit
- Frequency response: 18–22,000 Hz
- SPL (at 1 kHz, 1 V): 122 dB

HD 449

The HD 449 stands out from the crowd with their striking, kink design and high-quality audio reproduction. Delivering detailed sound and clarity, both indoor and outdoor, with their advanced acoustic system, these headphones are guaranteed to please. Their design ensures a comfortable fit around your ears and isolate ambient noise.

- Ergonomic design provides a comfortable fit
- Gold-plated plugs and 6.3 mm stereo adapter
- Frequency response: 16–24,000 Hz
- SPL (at 1 kHz, 1 V): 114 dB

HD 419

The HD 419 headphones are a fusion of attractive aesthetics with a powerful, punchy, dynamic bass. With their closed circumaural design, you can expect efficient isolation of ambient noise, making them friendly in all environments. Their special single-sided cable eliminates tangling and ensures comfort and usability.

- Convenient single-sided cable
- Sophisticated in-mold finishing
- Frequency response: 20–20,000 Hz
- SPL (at 1 kHz, 1 V): 108 dB

HD 219

Experience the sound quality that you deserve with a design that is minimalistic yet sophisticated. The HD 219 is a pair of closed-back on-ear headphones that are versatile. It will provide you with sufficient bass and blocks out ambient noise, which is suitable for all work and play situations.

- Powerful, bass-driven stereo sound
- Closed on-ear headphone design blocks out ambient noise
- Frequency response: 19–21,000 Hz
- SPL (at 1 kHz, 1 V): 108 dB

HD 219s **NEW!**

Experience vibrant sound with punchy bass with Sennheiser's HD 219s Universal on-the-ear headset. Easy management of calls, tracks and volume is achieved with the smart in-line remote with integrated microphone.

- Universal fit with any smartphone brand featuring 3.5 mm headphone jack
- Closed design that isolates ambient noise
- Frequency response: 19–21,000 Hz
- SPL (at 1 kHz, 1 V): 108 dB

HD 218i

The HD 218i features a closed design with a strong emphasis on bass. This headset with remote unit enables you to fully control your iDevice – simply push the buttons integrated in the cable to control the volume, skip tracks, answer, end or reject calls and activate the Voice Control.

- Smart remote with mic: enhanced usability for the latest models of iPod, iPhone and iPad
- Closed supra-aural design blocks out ambient noise; creates a controlled environment for better sound
- Frequency response: 19–21,000 Hz
- SPL (at 1 kHz, 1 V): 108 dB

HD 239

Expect a timeless design and a touch of class with the HD 239 headphones. Their advanced acoustic system with powerful neodymium magnets ensure maximum performance and high-fidelity audio. A top-notch and smooth stereo sound experience ensues.

- Lifelike stereo sound experience
- Premium metallic components and exchangeable earpads
- Frequency response: 16–23,000 Hz
- SPL (at 1 kHz, 1 V): 114 dB

PX 30-II

The PX 30-II are a pair of open, dynamic, supra-aural mini headphones for portable media players. Thanks to the bass tube and ultra-light membrane, they deliver a balanced sound that easily outperforms other conventional mini headphones. Strut the streets in style accompanied by a moving sound experience.

- Transparent, bass-driven sound
- Lightweight and comfortable
- Frequency response: 30–20,000 Hz
- SPL (at 1 kHz, 1 V): 115 dB

HD 229

Your urban active lifestyle is never complete without the HD 229. These headphones provide excellent bass performance, feature juxtaposing, salient colors and a street-style design. The single-sided cable provides ease-of-use, making these headphones delightful accoutrements in all pursuits.

- Powerful neodymium magnets
- Outstanding bass performance
- Frequency response: 18–22,000 Hz
- SPL (at 1 kHz, 1 V): 110 dB

MM 100

The MM 100 headset lets you enjoy music and never miss a call from your mobile phone. The lightweight neckband wearing style is sturdy and perfect for your active lifestyle and daily commute without the hassle of cables. The MM 100 has an integrated microphone for making calls with mobile phones that support Bluetooth®.

- High-quality Bluetooth® wireless transmission
- Ultra lightweight neckband design makes it ideal for all active pursuits
- Frequency response: 22–20,000 Hz
- Up to 9 hours of talk time

Home entertainment. Wireless headphones.

Enjoy wireless freedom without compromising on sound quality. Sennheiser's digital and analog wireless headphone systems are the ideal solution. Long battery life, reception of up to 100 m and outstanding playback audio are the features of these headphones.

RS 220

Take to a new level of audiophile listening appreciation with the digital wireless RS 220. Comprising of an open, circumaural headphone and a sveltely designed transmitter, this digital wireless headphone system delivers a sound performance equaling that of high-end wired headphones.

The RS 220 headphones are optimized for all analog and digital audio sources. All things considered, the RS 220 truly offer new levels of audio detail, refinement and transparency for discerning audio lovers.

- Digital audio transmission in CD Quality
- Extremely comfortable and luxurious velour earpads
- Digital optical and coaxial sockets plus an analog socket
- Frequency response: 16–22,000 Hz

RS 180

These open headphones can breathe from the circumaural earcups, offering an excellent sound image. Capable of serving up to four pairs of headphones, they utilize a sophisticated digital wireless audio transmission.

- Clear and detailed audio reproduction
- Balance control for setting the volume for the right and left ear
- Headphone operating time: up to 24 hours
- Frequency response: 18–21,000 Hz

RS 170

The RS 170 offers weighty, full-bodied and detailed sound reproduction. While leatherette earpads and headband cushions provide outstanding comfort, its closed, circumaural design prevents sound leakage.

- Dynamic bass and surround sound modes
- Transmitter also functions as charging station
- Headphone operating time: up to 24 hours
- Frequency response: 18–21,000 Hz

RS 160

The RS 160 is a two-part system that utilizes a high-quality digital wireless audio transmission, capable of serving up to four pairs of headphones. Rousing and full-bodied bass delivery is expected while the closed, snug fit isolates outside noise.

- Powerful, bass-driven sound
- Compact, portable transmitter with multi-receiver capability
- Headphone operating time: up to 24 hours
- Frequency response: 18–21,000 Hz

RS 120 II

The RS 120 II delivers transparent and well-balanced sound matched with exceptional bass response. Enjoy the outstanding wearing comfort of this open, circumaural wireless headphone while experiencing total freedom of movement. What is more, the "easy recharge" function makes charging the headphone a breeze.

- Lightweight and comfortable
- Transparent sound with strong bass
- Headphone operating time: up to 20 hours
- Frequency response: 22–19,500 Hz

RS 110 II

The RS 110 II breathes new life into audio with its high sound quality. Its detailed, balanced sound reproduction coupled with strong bass response allows you to rediscover the world of wireless freedom with a touch of simplicity and elegance.

- Excellent bass reproduction
- Suitable for all types of modern music and TV applications
- Headphone operating time: up to 22 hours
- Frequency response: 22–19,500 Hz

Home entertainment. TV headphones.

Desire undisturbed television enjoyment? Look no further with our range of TV sound systems. You can set your preferred volume and enjoy freedom of movement without worrying about disturbing anyone else.

RS 4200-II TV

The RS 4200-II TV entralls with its smooth RF audio transmission and clear-cut operation. This listening system establishes the yardstick for performance matched with a conspicuous design.

- Sound transmission through walls and ceilings
- Excellent sound reproduction
- Operating time (receiver): up to 9 hours
- Frequency response: 50–16,000 Hz

ENERGIESPAREND / Energy saving /
Consommation d'énergie réduite

IS 410 TV

This lightweight infrared stereo headphone system enables you to individually adapt volumes to your hearing preference. Operation of the system is easy and intuitive – automatically switches on when worn.

- Excellent speech intelligibility
- Transmits sound within a room, at a distance of up to 12 m
- Operating time (receiver): up to 16 hours
- Frequency response: 50–16,000 Hz

Set 50 TV

This infrared mono listening system is ideal for listening to TV sound within a room, up to a distance of 12 m. It features a power/volume and balance control on the receiver, offering great convenience.

- High speech intelligibility
- Very lightweight
- Operating time (receiver): up to 9 hours
- Frequency response: 50–12,000 Hz

HD 65 TV

The HD 65 TV is a pair of closed TV stereo headphones designed specifically for watching TV and movies. Not only are they comfortable and lightweight, they also feature superb speech lucidity and deliver a high-quality reproduction of TV sound. These headphones come with a connection cable of 5.2 m and have an integrated volume control for direct connection to your TV. Additionally, there are also separate controls for the left and right channels.

- Extra-long 5.2 m connection cable
- Good attenuation of ambient noise
- Frequency response: 25–20,000 Hz
- SPL (at 1 kHz, 1 V): 112 dB

HD 35 TV

These TV headphones provide a balanced, clear reproduction of TV sound while the volume control on their connection cable offers separate controls for the left and right channels. Not to forget, they are also lightweight; hence, they are ideal for those long nights indulging in your favorite movies or TV programs.

- Extra-long 5.2 m connection cable
- Independent volume control
- Frequency response: 30–20,000 Hz
- SPL (at 1 kHz, 1 V): 115 dB

Professional. DJ and monitoring headphones.

Sennheiser's professional headphones provide effective shielding from all ambient noise and have outstanding monitoring characteristics. They are extremely robust and resilient, making them perfect for clubs and studios.

HD 205-II

The elegant HD 205-II are medium-sized, supra-aural headphones that provide excellent sound quality and brilliant shielding of ambient noise. Their rotatable earcups and the single-sided cable make them professional companions for DJs. These headphones come with a convenient protective pouch for easy storage and transportation.

- Outstanding passive attenuation of ambient noise
- Rotatable earcup for one-ear listening
- Frequency response: 14–20,000 Hz
- SPL (at 1 kHz, 1 V): 112 dB

HD 215-II

Enjoy excellent sound with these closed headphones that both have outstanding sound characteristics and provide excellent shielding of ambient noise. Their rotatable earcups are made for one-ear listening and the single-sided coiled cable makes them ideal for DJ monitoring and sound engineering. They provide rich stereo sound and are extremely comfortable to wear.

- Excellent attenuation of ambient noise
- Earcup is rotatable for one-ear listening
- Frequency response: 12–22,000 Hz
- SPL (at 1 kHz, 1 V): 112 dB

Portable entertainment. Travel.

Indulge in first-class travel – the headphones of the Sennheiser Travel line belong in this league. The active NoiseGard™ system effectively attenuates ambient noise, allowing you to concentrate fully on excellent stereo sound.

CXC 700

Presenting the CXC 700, Sennheiser's inaugural travel ear-phones with NoiseGard™ / digital and TalkThrough function. Engineered for discerning business travelers and frequent flyers, these premium ear-canal phones feature the latest incarnation of Sennheiser's active noise-cancelling technology in three different modes, which identifies and reduces even more unwanted ambient noise.

- Highly advanced acoustic system for excellent audio performance
- Audio transmission that always works – even in passive mode and without batteries
- Frequency response: 20–21,000 Hz
- SPL (at 1 kHz, 1 V): 108 dB

MM 550-X TRAVEL

One of the best Bluetooth® headsets, the foldable, around-the-ear XL-size MM 550-X TRAVEL offers audiophile travelers uninterrupted luxury with music and calls. This high-end collapsible stereo headset sports CD quality sound reproduction, NoiseGard™ 2.0 active noise cancellation, extra-large earcups and SRS WOW HD™ technology for more immersive listening.

- CD quality audio with the apt-X® Bluetooth® codec
- NoiseGard™ 2.0 and TalkThrough function
- Collapsible, metal-reinforced headband
- Integrated microphone for making calls with Bluetooth® compatible headsets

MM 500-X **NEW!**

The new MM 500-X Stereo Bluetooth® headset delivers top-quality on-the-road music and call experiences. Featuring a super comfortable around-the-ear fit, the MM 500-X offers CD quality music via the new apt-X® codec, which delivers higher quality Bluetooth® audio. The headset can connect wirelessly to any Bluetooth and apt-X® enabled devices, such as new Apple computers, selected Creative and Samsung music products, and lets you quickly switch between music and calls at just the press of a button. Sennheiser hi-fi technology and an invisible microphone deliver superb stereo sound and clear conversations wherever you are.

- Foldable – folds into a compact bundle for travel and storage
- Easy headset controls – in one intuitive cluster on the ear cup with integrated microphone
- Frequency response: 15–22,000 Hz
- SPL (at 1 kHz, 1 V): 107 dB

MM 450-X TRAVEL

Silence is golden with the on-ear MM 450-X TRAVEL for cell phones and computers. This best-of-breed foldable stereo Bluetooth® headset features CD quality audio reproduction, Sennheiser's NoiseGard™ 2.0 active noise-cancelling system. With 90% of background noise canceled out, you can take a call in crystal-clear quality or relax with your favorite music in outstanding Sennheiser stereo sound.

- CD quality audio with the apt-X® Bluetooth® codec
- NoiseGard™ 2.0 and TalkThrough function
- Collapsible, metal-reinforced headband
- Frequency range: 15–22,000 Hz
- Integrated microphone for making calls with Bluetooth® compatible headsets

MM 400-X

The MM 400-X is a state-of-the-art on-ear stereo Bluetooth® headset for multimedia cell phones and computers. With one press of a button, you can quickly switch between calls and music delivered in superb stereo sound.

- CD quality audio featuring the apt-X® codec, the headset can connect wirelessly to any Bluetooth® apt-X® enabled devices
- Collapsible, metal-reinforced headband
- Frequency response: 15–22,000 Hz
- SPL (at 1 kHz, 1 V): 107 dB

MM 80i TRAVEL

As a successor of the MM 80 for iPhone, the MM 80i TRAVEL now offers an upgraded in-line remote with microphone that works seamlessly with the latest generations of iPod, iPhone and iPad.

- Detachable smart in-line remote with microphone
- Optimized for traveling – supplied with a 3.5 mm plug for Apple devices – plus an adapter for in-flight entertainment systems
- Frequency range: 10–18,000 Hz
- Impedance: 16 Ω

PXC 450

The PXC 450 is a circumaural high-end travel headphone set with NoiseGard™ 2.0 technology and TalkThrough function for the best possible attenuation of ambient noise. The PXC 450 enables an unprecedented sound experience for people on the move, thanks to its adaptive baffle damping in combination with the patented Duofol diaphragms, which prevent unwanted partial oscillation and thus guarantee a highly natural, lifelike sound quality.

- NoiseGard™ 2.0 and TalkThrough function
- Natural sound experience
- Frequency response: 8–28,000 Hz
- SPL (at 1 kHz, 1 V): 108 dB

PXC 250-II

Highly portable travel headphones, such as the PXC 250-II mini headphones with NoiseGard™ active noise cancellation technology. The closed, supra-aural design provides an excellent passive attenuation of ambient noise. The newly improved battery pack lasts up to 50 hours. Additionally, the steel-reinforced headband is extremely durable and robust.

- NoiseGard™ active noise cancellation
- Integrated volume control
- Frequency response: 10–21,000 Hz
- SPL (at 1 kHz, 1 V): 112 dB

Gaming headsets.

PC, Xbox 360[®] and Playstation 3[®].

Gaming time is your time, and every Sennheiser gaming headset comes with a built-in mission: to deliver pure emotion and excitement, and give you the full experience your games deserve. It is no coincidence that many games are recorded with Sennheiser audio equipment, too.

PC 363D **NEW!**

The Sennheiser PC 363D Surround Sound Gaming Headset provides a deep and realistic directional audio experience. Developed with Dolby[®], it delivers 7.1 surround sound for the non-compromising PC player.

- Professional Gaming headset in open design
- Frequency response: 15–28,000 Hz
- SPL (at 1 kHz, 1 V): 112 dB

PC 360

Developed with a top eSport team, the PC 360 headset delivers state-of-the-art audio. You stay in touch with your surroundings. Thanks to the ultra comfortable earcups, professional microphone and quick access controls, you only need this headset for music, videos and Skype.

- Professional gaming headset with open acoustic design
- Automatic mic mute by raising the boom
- Frequency response: 15–28,000 Hz
- SPL (at 1 kHz, 1 V): 112 dB

PC 350 SE **NEW!**

The Sennheiser PC 350 Special Edition Noise Blocking Gaming Headset features optimized sound for competitive gaming as well as an updated and even more durable design.

- Closed design – hear the slightest details even in noisy environments
- Frequency response: 10–26,000 Hz
- SPL (at 1 kHz, 1 V): 108 dB

PC 350

The PC 350 is a closed, circumaural headset. It improves your ability to detect where a sound comes from. Sound perception is so precise that you are totally immersed in a game.

- Superior passive attenuation of ambient noise
- Frequency response optimized for binaural perception
- Frequency response: 10–26,000 Hz
- SPL (at 1 kHz, 1 V): 108 dB

PC 333D

The PC 333D headset tears up the script for professional 3D gaming with its hyper realistic, multi-channel soundscape and earhugging closed design. It would take even the most raucous gaming party to a whole new level of intensity and dimension.

- 7.1 surround sound powered by Dolby® technologies
- Automatic mic mute by raising the boom
- Frequency response: 14–22,000 Hz
- SPL (at 1 kHz, 1 V): 112 dB

PC 330

A high-performance headset for gamers, the PC 330 provides an intuitive design and a competitive edge. Closed acoustics keep gamers focused on the game while with a swivel of the DJ Hinge earcup, they are able to communicate directly with their teammates. Between rounds, easily mute the microphone by raising the boom and relax to music or videos in quality sound.

- DJ Hinge for direct communication
- Automatic microphone mute by raising the boom
- Frequency response: 14–22,000 Hz
- SPL (at 1 kHz, 1 V): 112 dB

PC 323D

The PC 323D embodies 3D gaming. Dolby® Headphone and Dolby® Pro Logic® IIx raise the bar in experiencing immersive and realistic 7.1 surround game audio. The CircleFlex™ earcups with open-acoustic design are super comfortable and perfect for long gaming sessions. The pro noise-cancelling microphone for clear chats, automatic microphone mute and on-ear volume control round up the package.

- CircleFlex™ earcups for maximum comfort
- 7.1 surround sound powered by Dolby® technologies
- Frequency response: 15–23,000 Hz
- SPL (at 1 kHz, 1 V): 113 dB

PC 320

The PC 320 is an ultra comfortable headset. With its open-acoustic design, which lets in air to keep your head cool, and its CircleFlex™ earcups, it is ideal for long gaming sessions. It features the superb Sennheiser stereo sound and pro noise-cancelling mic.

- CircleFlex™ earcups for maximum comfort
- Automatic microphone mute by raising the boom
- Frequency response: 15–23,000 Hz
- SPL (at 1 kHz, 1 V): 113 dB

PC 310

The PC 310 upgrades your gaming experience. It delivers a great Sennheiser sound with your PC games. The noise-cancelling microphone reduces background noise, and the durable build is very comfortable and lightweight, for hours of gaming.

- Open-acoustic design
- Noise-cancelling microphone
- Frequency response: 17–22,000 Hz
- SPL (at 1 kHz, 1 V): 118 dB

PC 151

The PC 151 is an over-the-head, binaural headset. It features an adjustable, ultra comfortable headband, in-line volume control, microphone mute switch and large velour earpads that effectively block out ambient noise.

- Adjustable headband
- Closed-back ear capsules to reduce background interference
- Frequency response: 18–22,000 Hz
- SPL (at 1 kHz, 1 V): 112 dB

U 320 **NEW!**

The U 320 Multi-Platform Gaming Headset provides you with great audio quality and wearing comfort when gaming on your PC, Mac or console. It features CircleFlex™ earmcups to ensure the earpads adjust automatically to your head while an open-acoustic design allows built-up heat to escape, keeping your head cool while gaming.

- Compatible with PS3®/Xbox®/PC/Mac
- CircleFlex™ earmcups adjust automatically to the user
- Dual volume control for game audio and voice chat
- Frequency response: 15–23,000 Hz
- SPL (at 1 kHz, 1 V): 113 dB

X 320

The slightest sound and clarity of communication affect the outcome of victory. So do not take any chances – raise the level of your gaming and experience superior amplified stereo sound with bass boost with the X 320.

- CircleFlex™ earcups adjust automatically to the user
- Works with Xbox 360®
- Low noise amplifier for maximized clarity
- Frequency response: 15–23,000 Hz
- SPL (at 1 kHz, 1 V): 113 dB

XBOX 360..

X 2

The X 2 is the perfect sound companion for your Xbox. This headset provides quality sound and its noise-cancelling microphone filters out any ambient noise for clear communication.

- In-line volume control and mute switch
- Works with Xbox 360®
- Frequency response: 42–17,000 Hz
- SPL (at 1 kHz, 1 V): 95 dB

XBOX 360..

Portable entertainment. Sennheiser / adidas Sports.

The innovative design of the Sennheiser / adidas Sports line offers, besides outstanding sound, the most comfortable and secure fit when engaging in all active pursuits. All headsets are made of high-quality special sweat- and water-resistant materials.

CX 685 SPORTS **NEW!**

Take charge and play as hard as you want with these energetic and new ear-canal phones, without slowing down. They ensure that you experience high attenuation of ambient noise and allow you to concentrate on the things that matter most to you, both your music and workouts. Boasting strain relief parts that are made of highly flexible, shock-absorbing material, experience unmatched strength and durability.

- Sealed in-ear-canal design for enhanced blocking out of ambient noise
- Para-aramid reinforced cable provides superior strength and reliability
- Frequency response: 18–20,000 Hz
- SPL (at 1 kHz, 1 V): 120 dB

MX 685 SPORTS **NEW!**

Move up the fitness ladder and work out harder with the Sennheiser / adidas MX 685 Sports earphones. Their high-output drivers deliver a powerful and energizing stereo sound, motivating you to run that extra mile. Its in-ear design provides greater situational awareness and safety while its para-aramid reinforced cable offers superior strength and reliability.

- In-ear design for greater situational awareness and safety
- Slide-to-fit system for adjustable individual fit
- Frequency response: 18–20,000 Hz
- SPL (at 1 kHz, 1 V): 118 dB

OCX 685i SPORTS **NEW!**

Achieve your fitness goals with the Sennheiser / adidas OCX 685i Sports earphones. Featuring high-output drivers that deliver a natural sound reproduction and ergonomic earclips, you will be motivated to fitness success. A unique moisture protection system protects the sound system from perspiration and water.

Also available in white!

- In-line smart remote and microphone on para-aramid reinforced cable
- Ergonomic earclips for optimal wearing comfort and secure fit
- Frequency response: 18–20,000 Hz
- SPL (at 1 kHz, 1 V): 120 dB

PX 685i SPORTS **NEW!**

Train and run in total comfort with the Sennheiser / adidas PX 685i Sports headphones. Their fully adjustable headband follows the contours of your head, providing a secure custom fit while high-output drivers deliver an energizing stereo sound, pepping you up during your run or workout. Their in-line smart remote and microphone give you total control of music tracks and calls while you immerse yourself in your workout.

Also available in white!

- In-line smart remote and microphone on para-aramid reinforced cables
- Adjustable headband for secure individual fit
- Frequency response: 18–20,000 Hz
- SPL (at 1 kHz, 1 V): 120 dB

PMX 685i SPORTS **NEW!**

Turn up the heat and let nothing get in your way with the Sennheiser / adidas PMX 685i Sports neckband headset. Lightweight and sturdy, earphones stay extremely securely in your ear while you run. Sound-wise, their high-output drivers deliver a powerful and natural stereo sound. The in-ear design of the headset provides situational awareness and safety.

- In-line smart remote and microphone on para-aramid reinforced cable
- Ultra lightweight neckband for secure comfortable fit
- Frequency response: 18–20,000 Hz
- SPL (at 1 kHz, 1 V): 120 dB

Communication.

Internet telephony and multimedia.

Your voice is being transferred with crystal-clear sound while using Internet telephony. Say hello to Internet telephony and goodbye to expensive phone bills.

PC 36 CALL CONTROL

With an improved noise-cancelling microphone and Sennheiser stereo quality, the PC 36 CALL CONTROL is the ideal headset for Internet telephony, music, movies and more. The new 3-in-1 unit for volume/mute and call control means you can quickly adjust settings and take/end calls directly on the headset, thanks to the free HeadSetup software download.

- Stereo USB headset with 3-in-1 control
- Adjustable microphone boom
- Frequency response: 40–18,000 Hz
- SPL (at 1 kHz, 1 V): 109 dB

PC 230

This multimedia headset delivers cutting-edge stereo sound and added comfort for pristine telephony, resulting in an inspirational entertainment experience. Features like automatic microphone mute, left/right reversibility and on-earcup volume control put the PC 230 in a comfort class of its own.

- Integrated volume control
- Automatic microphone mute by raising the boom
- Frequency response: 18–22,000 Hz
- SPL (at 1 kHz, 1 V): 113 dB

PC 141

Thanks to its superb stereo sound, the PC 141 behind-the-neck binaural headset is great for making calls over the Internet. Also, it is ideal for gaming, VoIP applications and enjoyment of music and movies. Its stylish neckband makes it an extremely comfortable piece of kit.

- Extremely comfortable neckband design
- Adjustable microphone position
- Frequency response: 40–20,000 Hz
- SPL (at 1 kHz, 1 V): 109 dB

PC 131

The PC 131 is an over-the-head binaural headset offering great stereo sound. Ideal for gaming, voice recognition Internet telephony and other VoIP applications, it is also perfect for listening to music and watching movies. Being lightweight and comfortable, users are able to wear it for extended periods of time and still feel fresh and comfortable.

- Stereo headset with single-sided cable
- Robust microphone for high speech intelligibility
- Frequency response: 30–18,000 Hz
- SPL (at 1 kHz, 1 V): 112 dB

PC 121

The PC 121 is an over-the-ear monaural headset in an ultralight design. It is ideal for inexpensive Internet telephony while traveling, working or in the comfort of your own home. The headset is portable and will fit snugly in your baggage or on your desk.

- Robust microphone for high speech intelligibility
- Adjustable microphone position and earclip
- Frequency response: 45–15,000 Hz
- SPL (at 1 kHz, 1 V): 114 dB

PC 31-II

Move up to the Sennheiser sound with the PC 31-II multimedia headset. The improved noise-cancelling microphone delivers your conversations over the Internet with clarity while the double-sided lightweight headband is adjustable for comfortable wearing all day long.

- Stereo lightweight headset
- Adjustable microphone boom
- Frequency response: 40–18,000 Hz
- SPL (at 1 kHz, 1 V): 109 dB

PC 26 CALL CONTROL

The single-sided PC 26 CALL CONTROL Internet telephony headset combines single-sided comfort with a 3-in-1 unit for adjusting the volume/mute and for call control. A free HeadSetup software is included.

- Single-sided USB headset with 3-in-1 control
- Adjustable microphone boom
- Frequency response: 40–18,000 Hz
- SPL (at 1 kHz, 1 V): 109 dB

PC 21-II

The PC 21-II is a single-sided headset that lets you enjoy phoning over the Internet while keeping an ear on what's going on around you. It's easy to use and features an improved noise-cancelling technology for great voice clarity. Not only is the microphone fully flexible, it is also ideal for using speech recognition applications.

- Single-sided headset with flexible boom
- Adjustable microphone boom
- Frequency response: 40–18,000 Hz
- SPL (at 1 kHz, 1 V): 109 dB

PC 11

The PC 11 Internet telephony headset makes it easy to communicate over the Internet, thanks to its one-handed operation, while the ultralight on-ear design is stylish yet discreet. In addition, the speech clarity is adjustable, providing flexibility, while the various wearing styles give you the option to wear the headset on either side.

- Adjustable, omni-directional microphone
- Two ear hooks for flexible wearing
- Frequency response: 45–18,000 Hz
- SPL (at 1 kHz, 1 V): 113 dB

PC 8 USB

Sennheiser stereo sound, a noise-cancelling microphone together with the convenient in-line volume/mute control unit are just some features of the PC 8 USB. Add to these the ease of a USB plug-and-play and you have a headset that is the ultimate in convenience and quality.

- Light and comfortable
- Integrated volume control
- Frequency response: 42–17,000 Hz
- SPL (at 1 kHz, 1 V): 95 dB

PC 7 USB

Just plug it into your computer and start talking over the Internet while keeping in touch with your surroundings. The PC 7 USB features USB plug-and-play. Ideal for families, its single-sided wearing style lets you stay aware while chatting, so you'll never miss a moment of the action around you.

- Light and comfortable
- Single-sided design
- Frequency response: 42–17,000 Hz
- SPL (at 1 kHz, 1 V): 95 dB

PC 3 CHAT

Enjoy Sennheiser stereo sound while talking over the Internet or listening to music. The PC 3 CHAT headset is extremely easy to use and durable enough to withstand the most active lifestyles. The quality noise-cancelling microphone ensures clear conversations with friends and family anywhere in the world.

- Light and comfortable
- Easy to use
- Frequency response: 42–17,000 Hz
- SPL (at 1 kHz, 1 V): 95 dB

PC 2 CHAT

Immerse yourself in the signature Sennheiser sound with the PC 2 CHAT. It is perfect for those who want to communicate clearly and comfortably over the Internet with their family and friends around the world. Its single-sided wearing style lets you stay aware of your surroundings at all times.

- Light and comfortable
- Easy to use
- Frequency response: 42–17,000 Hz
- SPL (at 1 kHz, 1 V): 95 dB

Communication. Wireless mobile.

Whether you're in the office or on the road, being a professional working in the modern world, you'll need to keep in touch with your customers and colleagues. Our wireless business headsets use breakthrough technology, making sure your voice always comes through loud and clear, and you'll never have to strain to listen.
