

EXPERIENCE THE FREEDOM OF WIRELESS

#SOUNDEXTRAORDINARY

SHURE

EXPERIENCE THE FREEDOM OF WIRELESS

When it's time to reconnect with your fans, don't let cables hold you back.

Music helps us all to connect. It knows no boundaries. Lose yourself in the moment. Experience the crystal clear sound and reliability of Shure Wireless systems. Don't let anything hold you back.

With increasing numbers of devices competing for space in the wireless spectrum, operating wireless systems is becoming more and more difficult. More care and planning is needed to ensure you achieve clear, uninterrupted sound when setting up your wireless system. Shure are at the forefront of engineering and innovation when it comes to new technologies in digital wireless. With greater spectral efficiency and rock-solid connectivity, you can be free to give your fans the performance of a lifetime.

MAKE IT COUNT WITH #SHUREWIRELESS

Since 1925, we have passionately worked on delivering world-class audio performance, turning our passion for making great microphones and audio electronics into an obsession.

1953 — Shure introduces the worlds first wireless Microphone: the Shure Vagabond.

EXTRAORDINARY SOUND SINCE 1925

NEW

SLX-D DIGITAL WIRELESS

WIRELESS EXCELLENCE, WHEREVER REQUIRED

SLX-D builds upon the seasoned reputation of SLX reliability, combining out-of-the-box ease of use with market-leading Shure digital wireless expertise.

SLX-D delivers transparent, 24-bit digital audio and rock solid RF performance with easy setup and rechargeability options in a suite of versatile wireless system configurations. Featuring single half-rack and dual full-rack receiver options, SLX-D is suited to a wide range of applications, including education institutions, community theatres, live events and performances.

BLX WIRELESS

STRAIGHTFORWARD SOUND

The perfect entry point to analogue wireless systems.

Perfect for those looking to experience the freedom of wireless for the first time. BLX analogue wireless systems offer great sound and a wide range of transmitter form factors in single and dual-channel rackable receiver options. Say goodbye to noise and dropouts and be fully immersed in the moment. For small stage performances without limits.

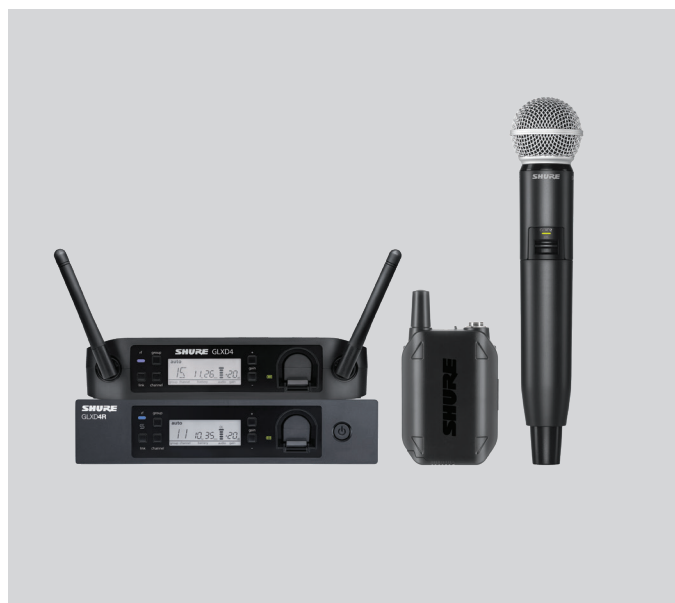

GLX-D DIGITAL WIRELESS

DIGITAL CLARITY, MADE FOR MUSICIANS

License-free usage, all over the world.

GLX-D gives you more freedom from interference than a traditional analogue system. By using the globally licence-free 2.4 GHz band, the system maintains clear channels through automated management of available frequencies. Also available as rack version as GLX-D Advanced with more channel count and smart frequency manager options for Plug&Play multi-setup.

QLX-D DIGITAL WIRELESS

BIG SOUND FOR BIGGER STAGES

Accurate reproduction with added security.

Compatible with Shure Wireless Workbench® software, QLX-D gives you real-time access, monitoring and control throughout the performance which lets you streamline setup across multiple receivers. You can even manage the system from your iOS device for ultimate convenience.

TIP

GUITAR AND BASS TIP:

GLXD16 PEDAL BOARD

Wireless system for guitarists and bassists with digital pedal receiver

Precision-engineered for guitarists and bassists, GLXD16 is a digital pedal board receiver that combines automatic frequency management for rock-solid signal and exceptional audio clarity with a built-in tuner.

UPGRADE TO IN-EAR MONITORING?

Professional sound that moves with you.

Say goodbye to wedge monitors for good. When you're on stage, you need to experience the freedom and clarity of in-ear monitoring. The combination of our PSM **wireless monitoring systems** and professional **in-ear earphones** deliver superior sound quality to performers onstage. The confidence that comes with this consistency makes legendary performances possible, night after night.
